

doubting the existence of anyone or anything  
depends on someone or something that can exist in doubt

where does doubt come from.

does it come before the existence of doubt  
does it come before the existence of the doubter  
does it come before the existence of doubt with a doubter  
or  
does it come afterwards when the question is no longer in doubt.

is it in a presence that is not a presence.  
is it in not a presence that is a presence.

i am glad that i can pull the sheets  
over my head whenever i feel  
metaphysical threats coming  
and want to avoid the personal  
asking me do i have to be that way.

it is not the question of whether you exist by doubting everything  
or if you exist by believing in something.

it is about the appearance of things...  
what does doubt look like when it is confirmed.  
what does confirmation look like when it is in doubt.

doubt.
