

some fathers push their sons down  
and hold them underwater  
until they are too tired to continue to damage the brain even more  
or the bubbles stop breaking the surface.  
these are the fathers that do not know  
how to swim  
or how to teach their sons to swim  
or they do not want to share the pool  
or they are not really your father after all.

some fathers.
