

the unintentional intention interferes with the intentional one.

i do not know how it happened.

it just happened.

who could have guessed.

who could have known.

i could not have imagined.

who would have thought.

out of the blue.

i did not see it coming.

a complete surprise.

what just occurred.

a sudden shock.

stunned.

when you hear this

it is an affirmation that a strange parasite

has attached itself to your brain and has taken control of events

or the unconscious is talking to you directly from its nest of darkness.

when you hear this.
